A FINE RESCUE

(From the Viking News)
At Camp Lake on Sunday last a tragedy was averted by quick action and a knowledge of the proper methods of reviving a drowned individual. Among the visitors at the Girls' Camp, a young man from Irma, Gerald Urquhart, attempted to swim to the diving pier. When almost there he sank without making any outcry. Carl Rosen noticed him as he was evidently sinking for the last time and directing his brother's attention, Billy managed to grasp the man, but was pulled down in doing so. Billy stood on the floor of the lake and pushed Urquhart up to the surface, where Carl took him by the wrist and attempted to tow him to the pier. Someone made a dive just then, causing Carl to lose his hold, and Urquhart sank. Dr. Richardson, assisted by Ken Hilliker, succeeded in locating the body and brought it to the surface. By this time the boat, being patrolled as a safety measure by Howard Hilliker, was at the spot and took the unconscious man to the shore as quickly as possible. Here Nurse Ruby Jensen took charge and directed resuscitation methods. Again Dr. Richardson was the one to finally bring the lungs into operation. As ten minutes or more had elapsed from the time of going down until the man was on shore, there was a great load of anxiety lifted from the crowd when signs of life finally appeared, due to the ministrations of the athletic dentist. The presence of the boat at camp and the wise provision of the director, Miss Phyllis Collier, in having it on patrol near the swimmers, had much to do with saving the life of this young man.

On Monday Mr. Urquhart was taken to the Wainwright hospital where it was discovered he was suffering from septic pneumonia. Wednesday morning there was no change. A sister arrived from Saskatchewan on Wednesday. Mr. Urquhart is a nephew of Mr. and Mrs. M. McMillan.

NOTICE

Community Picnic, eight miles south of Irma, on August 7th. Full line of sports. Ladies please bring baskets. Tea and coffee will be supplied. Dance in the evening in Strawberry Plains school. Ladies will please bring sandwiches and cake.

United Church Notes

The local Orange lodges were well represented at the service in the Irma United church last Sunday evening, forming the major part of the congregation, and the whole service was in keeping with the special nature of the occasion. The pastor in extending a hearty welcome to the guests, said that they came not as strangers but as friends, since there was no real dividing line between them and the church fellowship as many local Orangemen were devoted church workers and vice versa. The subject of the sermon was "The Christian way of overcoming evil" based upon the text "Be not overcome of evil, but overcome evil with good." The choir sang Whittier's fine hymn "O brother man, fold to thy heart thy brother" with telling effect.

The services next Sunday, July 28, will be at Passchendale 11 a.m., and Roseberry 3 p.m. Both these services will be conducted by members of the Irma Fellowship Group. The evening service in Irma at 8 p.m. will be conducted by Rev. R. W. Griffith, B.A., of Jarrow. Members and friends are urged to welcome the guest preacher by their presence. The Fellowship Group will be in charge of the service at Jarrow. The pastor, Rev. E. F. Kemp, will be away taking the services on the Vegreville pastoral charge.

Eleven girls are attending the Girls' Camp at Camp Lake, north of Kinella, under the direction of Dr. Scott of Viking.

Mrs. Hyslop of Viking gave a very impressive address at a united meeting of the W.C.T.U. and the W.M.S. on Friday afternoon, at the home of Mrs. Locke. Mrs. Parkes presided, and both Mrs. Locke and Rev. E. F. Kemp expressed sincere appreciation for the informing and stirring address.

The Ladies' Aid of Alma Mater and Roseberry sponsored a delightful picnic at the Roseberry school on Friday afternoon and evening. A beautiful supper was served and many sittings were necessary to accommodate all the guests. Ball games and races in which old and young, married and single, took part, provided great amusement, and the happy company did not disperse until the evening shadows began to fall.

NEWS ITEMS FROM JARROW

The elder settlers of Jarrow spent Wednesday at the old-timers' picnic near Hardisty lake.

Ernie Wade had a narrow escape Tuesday last, when a blow torch blew to pieces in his hands and the gasoline caught fire. Fortunately men were at hand who succeeded in extinguishing the flames.

A car load of young people went from here Saturday morning to attend the Edmonton exhibition.

The Oxford group of Irma will take charge of the service in the United church of Jarrow Sunday evening, July 28th.

Mr. and Mrs. Warren Cochlin of Chigwell are visiting at the home of Mr. and Mrs. Ed. Peet. Mrs. Cochlin is the daughter of Mr. and Mrs. Peet.

Mrs. Peet, Ethel and Glen arrived home having completed their short vacation.

Mr. Jim Miller has been the successful bidder in getting the work of painting the school.

Dr. Greenberg of Irma was in town last Thursday, inoculating the school children.

The Beverage players presented their play entitled "The Amazon" at the community hall last Friday evening. The small audience enjoyed the play from beginning to the very end. The Beverage players expect to be in Jarrow again in the near future and will stage the play "Soft Soap."

"Did that patent medicine cure you?" asked a friend of a local citizen on the street. "Hardly," was the answer, "after reading the wrapper on the bottle I found that I had several other deceases."

"I thought you said you always have the last word with your wife. But I notice that she orders you around the whole time." "I do have the last word," was the reply. "Do you not always hear me say 'All right'?"

Through the columns of the Viking News in the next few issues your "Local Weed Inspector" shall give his views and opinions on our weeds, eradication and control.

—C. Ruzicka, Div. 4, Iron Creek M. D.

GLENORA STAMPEDE WEDNESDAY, JULY 31

One of the big attractions for Wednesday, July 31st, is the Glenora stampede, which is being looked forward to by many in this and adjoining districts. The stampede grounds are located 4 miles east and 5 miles south of Viking; 15 miles north of Sedgewick, and will be in fine shape for the many interesting events. For list of events see posters now out.

A bowery dance at night will wind up the day. The stampede is being sponsored by the Glenora Stampede Association, and a cordial invitation is extended the public to be in attendance. A good time assured all, and something doing all the time.

Weeds—Weeds—and Weed Inspectors.

(From the Viking News)
Weeds—little, big, good, bad, annual, winter-annual and perennial—they are all nasty pests, boarders which have invaded our fields with the firm intention of keeping possession. Robbing our crops of the so necessary plant-food, and what is much worse, of more than their share of the scant amount of moisture we get in this part of Sunny Alberta.

Weeds are here to stay and very likely so, are the weed inspectors. Weeds: if we cannot eradicate them, we can at least control them. By making a study of their habits and taking province-wide precautionary measures, we can keep them from driving us off the land entirely. But it takes the co-operation of all parties concerned. Since the weeds have taken possession, so the weed inspectors must be put up with also. In looking through the "Statutes of Alberta" we find that the season for fighting and the killing of weeds is open throughout the year, while that for inspectors is closed the year around.

If you happen to be fortunate enough to live in a very clean corner of his district and happen to have only a few scattered stink-weeds in your crop, and he asks you to pull and burn them, do not shoot him or get huffy and tell him to get after Sam Browne and Bill Jones, that their fields are a disgrace. Perhaps Sam's and Bill's land is so badly infested that even though they kept the whole army of the unemployed busy all summer their land would not be one-tenth as clean as yours is now. Their land being too badly infested to clean up by pulling and burning, they must take some means to control by a system of cultivation, or else go out of business. Therefore when your "inspector" asks you to pull and burn your few stragglers, it is not because he wants to be officious; all he wants is your help to keep your neighborhood clean as long as possible. Then when he talks with Sam and Bill he can truthfully point to your farm and district as an example of what can be done by good management and co-operation.

Through the columns of the Viking News in the next few issues your "Local Weed Inspector" shall give his views and opinions on our weeds, eradication and control.

—C. Ruzicka, Div. 4, Iron Creek M. D.

TYPHOID FEVER

Health Service of the Canadian Medical Association and Life Insurance Companies in Canada.

In cities and in armies, typhoid fever used to be a common and, frequently, a fatal disease. One of the encouraging results of our efforts to prevent disease is the practical elimination of typhoid fever from modern cities and, in the Great War, from among the soldiers.

This change has taken place under our own eyes so to speak, because having learned of the dangers of impure water and dirty milk, we have seen water supplies and milk supplies made clean and safe, followed by the disappearance of typhoid fever.

Why then write about this disease? There are several reasons. One is that there must be no let-down of present measures to keep water, milk and food supplies safe, or else the disease will return. Another is that while cities are practically free from typhoid fever, this disease continues to occur in many country districts.

Typhoid fever cannot be controlled as readily in the country as in the city. It is much easier to purify one central water supply than to secure proper protection for hundreds of wells. A city can have its milk supply made safe by pasteurization, but the country dweller keeps on using raw milk.

Typhoid fever is difficult to control in the country also because a lot in the country who recover from the disease, quite a number become carriers. That is, they continue to pass the germs of typhoid fever in their stools and urine for months and some times for years.

Such a person, visiting around in the country, may, if working in the kitchen, infect food, and will infect the privy which, if not carefully screened, gives access to flies which may soil themselves in the privy and later carry this contamination to the dining room or kitchen.

The privy being infected, the infection may spread to the well unless the latter is properly placed and so constructed as to prevent seepage from the privy to the well. If the well becomes infected, the infection reaches all the users of the water.

Typhoid fever will be banished from rural areas when privies are properly constructed and screened, wells built so as not to be subject to contamination, milk pasteurized or boiled in the home, and windows and doors screened to keep out flies.

The individual can secure protection through typhoid vaccine such as was used with success during the Great War.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

Barn Dance July 31st

A barn dance will be held in Cottrell's barn, nine miles north-east of Viking, on Wednesday, July 31st. A good time is assured, with good music. Everybody welcome. Admission—gentle 50c, ladies free. 17-24

Have You Met?

W. S. PEARCE, Purser of the Empress of Britain
Mr. Pearce is one of the best-known pursers in trans-Atlantic service, and during his long service with the Canadian Pacific has made friends with thousands of regular travellers. He was many years in the Empress of Scotland, and has been round the world so often that places like Bombay and Hong-Kong are as familiar to him as the rose-filled garden of his Southampton home.

The World Wheat Situation

At the present time the world wheat situation is governed by two important factors, namely (1) the volume of the old crop which will be required by importing countries before July 31, along with the conditions surrounding that movement, and (2) the development of new crops in Europe and in North America.

Interest in the 1935 production, says the monthly review by the Agricultural Branch of the Dominion Bureau of Statistics dated June 21, now centres around wheat crops in various stages of development in Canada, in the United States, and in Europe. While it is too early to indicate yields, owing to natural hazards to be experienced before the grain is ready for the market, there are several general observations that may be made, based upon developments up to the present time. In the first place, there is evidence that Europe is not going to harvest a better than an average yield per acre and there is little prospect of a recurrence of the phenomenal harvests of 1933.

The cool weather experienced in North America during the month of May was also prevalent in Europe, snow and frost being reported in central and northern countries. Adverse reports are being received from Spain, Portugal and Southern Italy, while crop conditions in France and Poland are not so favorable as they were a year ago. In North Africa, compared with a year ago, there will be a substantial reduction in the yield, the most important losses being reported from Morocco.

WINDERMERE A REAL CAMP

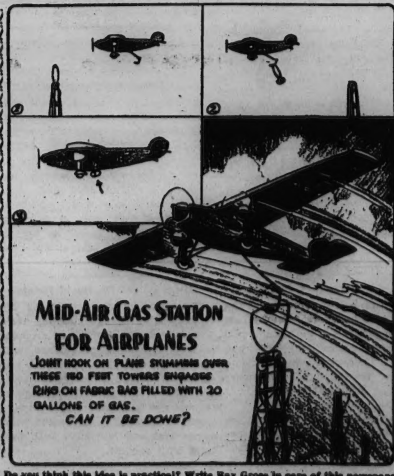

Striking while the iron is hot is a characteristic of the West that has gained the admiration of the rest of Canada. And so there is little surprise in the announcement that the Board of Trade at Invermere, B.C., has leased the bungalow camp at beautiful Lake Windermere for this summer, in anticipation of increased tourist traffic to the Canadian Rockies, which has been generally forecast in Europe, the Orient, and the United States. The camp, which is being taken over by small but energetic Invermere, is one of the most delightfully situated in the Canadian Rockies. Built originally by the Canadian Pacific Railway, this camp has been successfully operated for the past

several years as a private camp for girls. In the character of an ideal vacation district, it is easily reached by main mountain highways. The famous Banff-Windermere road leads to it, a good alternative route being through the mountains from Cranbrook. The lake averages about 58 degrees in the summer and is ideal for swimming and boating. Excellent trout fishing can be had in several creeks and smaller lakes near by and the lake itself has landlocked salmon of considerable size. Within a day's ride is the celebrated Lake of the Hanging Glacier, with six spectacular glaciers all concentrating in one moraine with an ice wall several hundred feet high which drops a continual succession of small icebergs into the lake.

The camp is a particularly good centre for a whole summer's rest and exploration, because many are the side trips that can be made by car, mountain-bred ponies, or on foot to adjacent spots of beauty or historic interest. Tennis courts and motor launches are available for the use of the guests. There is accommodation for 42 guests in the camp, which consists of a large main building, with wide verandah, and of separate small bungalows, equipped with single beds, stove, clothes closet, nice furniture, running water, and electric lights. A double bath-house, with hot and cold running water, contains separate bath rooms.

HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salada Black Tea in a pint of fresh boiling water. After six minutes strain liquid into two-quart container. While hot, add 1½ cups of granulated sugar and the juice of 2 lemons. Stir well until sugar is dissolved, fill container with cold water. Do not allow tea to cool before adding, else cold water, otherwise liquid will become cloudy. Serve with chopped ice.

"SALADA" ICED TEA

Short Life-Stories

Now and then the writer who is responsible for this column each week feels impelled, instead of writing an article himself, to pass on something he has read which may prove helpful and encouraging to others. This is one of those times when two or three short stories from real life seem to call for repeating.

There has been a lot of talk, the last few years, about how the worker is exploited under capitalism. Not much has been said about the other side of the picture. Let us tell then of a man, a small manufacturer, who, when the crash came, employed twenty people. His business has shrunk during the depression, but the same twenty are still on his payroll. What is more, he is still paying them the same wages. He has done this by ruthless cutting of his own expense, and by dipping into his own capital. He has carried the people who work for him as a personal responsibility. He doesn't like to talk about it. When questioned, he merely shrugs his shoulders and insists that he has done nothing extraordinary. "It's like horses," he says. "When you come in after a hard ride, you see that your mount is fed and watered, don't you? I can't do less for the people who work for me. I can't sleep when I know they aren't sleeping well. That's all there is to it." Such men do more toward making this a better world than a thousand laws, enforced by a million policemen. The Golden Rule is the one code that seems to work.

Real life beats anything the fiction writer can invent. Take the case of another man who used to be branch manager for a big concern. He had an impressive suite of offices, and a number of people working under him. He belonged to the best clubs, drove a big car, and lived well. As the years passed, he grew to take his position for granted. He began to pay more attention to outside interests and less to his job. Times grew hard, but he still took things easily. The home office was troubled. Hints, increasingly broad, seemed to have no effect on him. Finally it was decided that he must be discharged. But the boss, remembering his long years of service, intervened, and, in compromise, he was recalled to the home office. There he was given a desk among the city salesmen. It must have been a hard dose for him to swallow, but if he felt humiliated, he did not show it. He never referred to his former grandeur as a branch manager. Always smiling, he was down easier than any of the cubs; and as he stood one night in the bow of the ship which was taking him back to the wreckage of his career, he resolved to throw himself into the dark waves. But he happened to glance up to the great arch of the skies, filled with timeless stars; and suddenly his own life, happy or otherwise, seemed oddly unimportant. He returned to his problems, solved many of them, built a new and successful career upon the ruins of the failure—and, incidentally, became famous as an astronomer.

It is doubtful if there is any better cure for the weariness of spirit which comes from endless discussion of economics or disputation over such things as politics, than an hour or two with a microscope. For a trifling sum of money, one gains admission to a world full of new and fascinating things. In a single drop of water, scooped from the nearest ditch, there is literally endless entertainment. After a time in this world, with its breathless dramas and life-and-death struggles between incredible creatures, the real world seems curiously remote and unreal. One returns to it refreshed, and with a saner point of view. There is the man whose whole life collapsed in disaster. He saw nothing ahead, and as he stood one night in the bow of the ship which was taking him back to the wreckage of his career, he resolved to throw himself into the dark waves. But he happened to glance up to the great arch of the skies, filled with timeless stars; and suddenly his own life, happy or otherwise, seemed oddly unimportant. He returned to his problems, solved many of them, built a new and successful career upon the ruins of the failure—and, incidentally, became famous as an astronomer.

This is the time of year when young men, just out of school and college, are trying to plan their futures. Many write to friends, asking advice. The advice given by one such friend to a young man was as follows: All I can answer is that if I were just starting out to hunt a career, I'd look for it as far away from the big cities as I possibly could. There is more glamour in city life—perhaps more of what is called "success". The money-making possibilities are greater. But from what I have been able to observe in my journey through this vale of tears, the small-town man gets the most fun out of life. He may earn less, in dollars, than his city cousin does; but his living costs less, and he has more time in which to enjoy the dollars he has. If I had my life to live over, I think I'd start out by heading for a small community, and dig in there. Every now and then I'd visit a big city just to remind myself how smart I'd been to become a small-town fellow.

Expedition To Greenland

British Scientists To Spend Three Months In Arctic

Under the leadership of L. J. Wager, 14 members of the British East Greenland expedition left Aberdeen, Scotland, recently in Sir Ernest Shackleton's exploration ship, The Quest.

They planned to spend three months in the Arctic engaged in scientific work and will explore several mountains which have never before been visited.

The Quest is manned by a crew of Norwegians. Four members of the expedition were accompanied by their wives.

Nazi Newspapers Banned

Switzerland has banned the sale of all German newspapers in this country and suppressed the Nazi organ published in Zurich. The action of the federal council closely follows a similar move by Germany against Swiss newspapers.

Five thousand violets are picked daily in a nursery at Henfield, England, during the spring.

The Hat Went Home

Story From Liverpool Could Be Used By Ripley

An astonishing hat trick was performed by a 77 miles an hour gale on Merseyside. A Bebington (Birkenhead) man bought a new hat at a Liverpool shop, put it on his head, and carried his old hat in a paper bag. When he reached Bebington Station the wind lifted his new hat from his head and sent it sailing over the tops of the houses and out of sight. On reaching home he was amazed to find his new hat on the kitchen table. It had dropped in his backyard.

Beacons For Sahara Desert

Because of the rapid increase in traffic in the Sahara Desert Bebington beacons will be erected every six miles along the route of the trans-Saharan route for motor vehicles and airplanes. They will map the route clearly by day. Desert lighthouses are planned for night flying.

The sun's estimated surface temperature is about 12,000 degrees Fahrenheit.

To Promote Highway Safety

Ontario To Cope With Rising Tide Of Automobile Accidents

To cope with the rising tide of deaths from automobile accidents in Ontario, Hon. T. B. McQueen, minister of highways and acting attorney-general, announced 12 constables had been added to the provincial police force, most of them detailed to the highway traffic patrol.

Provision for additional traffic police marked the latest step in Mr. McQueen's campaign to promote highway safety. Possession of a driver's license has been made the basis for enforcing the traffic laws, said the minister, and he listed two other features of his safety campaign—police inspection of motor vehicles and equipment and an advertising campaign.

Departmental records showed 202 persons had been killed in automobile accidents during the first six months of this year, compared with 164 in the corresponding period of 1934. The June death toll was 44, an increase of 12 above the May total.

"A small fine does not quite meet the situation," said Mr. McQueen. "We will get more attention to the law if we exercise freely the cancellation of the driver's license for a term."

Giant Air Cruiser

United States Army Air Corps To Test Out Machine

A giant "flying battle cruiser," claimed the fastest and longest range bombing plane ever built, will be tested soon by the United States army air corps at Wright Field, Dayton, Ohio.

Specifications demanded by the air corps included: A speed of 200 to 250 miles an hour at 10,000 feet altitude, an operating speed of from 170 to 220 miles an hour at the same altitude; endurance at operating speed of from 6 to 10 hours; and a service ceiling of from 20,000 to 25,000 feet.

The aerial battle cruiser has a wing span of approximately 100 feet, length of 70 feet, height of 15 feet, and gross weight of about 15 tons.

Just a Coincidence

Scene Of Deduction Came As A Shock To Bus Conductor

A remarkable experience befell Col. Foley when he was traveling along Oxford street in a bus and heard the conductor telling a passenger the names of the shops that originally stood on the site of a large store. Surmising that the man had probably delivered letters there Col. Foley asked him: "How long ago were you a postman?"

"How did you know I was a postman?" the conductor retorted. "Quite simple, my dear Watson," said the colonel.

The man who had evidently not read his "Sherlock Holmes," nearly fell off the bus. His name actually was Watson.

New C.P.R. Liner

New Sister Ship For Empress Of Britain Is Projected

Sir Edward Beatty, president of the Canadian Pacific Railway Company, said before sailing to Canada from Southampton recently a sister ship for the Empress of Britain would be built.

"We shall need a new liner of the same type as the Empress of Britain," Sir Edward said, "to give a balanced service."

He added that an order would be placed two years before withdrawal from service of the Empress of Australia and the question of replacing that liner would come up within the next five years.

Substitute For Wool

A process to turn silk into a wool substitute which may free Japan from wool imports is claimed to have been found by Tohei Sakamoto, 38, inventor. He has produced a fibre declared to possess the elasticity, lustre and strength of good grade wool. Use of the process would also raise the price of raw silk, a condition which is largely responsible for the depression in the agricultural communities.

Little Wheat On Royal Estate

The Sandringham estate of His Majesty King George contains about 3,500 acres. The method of cropping is very much in accordance with that common in the district. A considerable acreage of barley is grown, and also a considerable acreage of turnips and mangels; but comparatively little wheat. In recent years sugar beet and flax have both been tried with success.

An Amusing Incident

Guide In Westminster Hall Embarrassed By Touring Party

Presentation of loyal addresses of parliament to the King in Westminster Hall during recent jubilee celebrations has recalled an amusing incident in the same historic chamber when a party of Scottish fishermen were touring London.

The girls from the north were being taken through the building by a police officer who pointed to the plate indicating where Sir William Wallace, national hero of Scotland, was in 1305 tried and condemned to death for treason against the English to whom he declared he owed no allegiance.

Immediately the Scottish women, with much power and expression, broke out in the well-known ballad "Scots Wha Hae W' Wallace Bled." This was a most improper proceeding, of course, and the women's escort was in a dilemma. His sympathies were with the women but his duty dictated either the suppression of the singing or the expulsion of the singers.

Without saying a word, the escort walked quietly away to look up a superior officer for instructions how to act in the matter. After some searching he found his officer and returned to the spot. As he had expected and wished, the singing was over and the songsters gone, leaving no trace. The officer did not report the incident, the account of which has leaked out since the jubilee celebrations.

Find Indian Relics

Remains Of Two Indians Unearthed In Saskatchewan

One of the most interesting finds of the season, in Saskatchewan, is that of Professor Vigfuson, at old Pinkus crossing, near Rocanville, the remains of two Indians in shallow graves. These have been carefully lifted and sent to the history museum at the University of Saskatchewan.

One of the graves yielded only a few bones, some charred, birch bark, and a few charred sticks. The other contained a complete skeleton of some Indian brave, in excellent state of preservation.

The body had been placed on its left side, facing west, and was just two feet below the surface of the ground. Thousands of colored beads of different shapes and sizes were found about the remains, also a large piece of flint and the rusted remains of what had been a hunting knife. There were also the bones of two small animals, possibly a squirrel and a mink, placed beside the body, as provisions on the long journey to the happy hunting grounds.

Professor Vigfuson has spent considerable time in the district gathering up historical data.—Regina Leader.

Keep Method Secret

Chinese Have Mysterious Way Of Holding An Autopsy

An ancient Chinese method of autopsy, known only to a closed group of practitioners, whose knowledge is handed down by word of mouth from generation to generation, has resulted in the release of the two sons of Chia Tehshun, who died 18 months ago.

On the basis of these findings of the method, known as "steam bones," the two sons have been freed of the suspicion of having murdered their father.

The body was examined and two "steam bones" experts attached to the Examination Department of the District Court were asked to perform an autopsy.

With the aid of yellow Chinese wine, some millet, a dash of vinegar, Chinese herbs and an umbrella, the experts were ready to announce the result of their investigation:

"Mr. Chiao met his death from hanging. However, it is clear that he hanged himself, and was not hanged by his sons or by any other person."

New Source Of Wealth

New Method Found For Extracting Gold From Sea Water

Recovery of gold from the waves, 10,000,000,000 tons of it in all the seven seas, appeared less of a dream with announcement in the publication "Science," that Professor Colin C. Pink, of the Columbia University department of electrochemistry had succeeded in recovering small amounts of the yellow metal from salt water.

Five thousand needy school children in Johannesburg, South Africa, are being fed by the city.

DARLING ONE-PIECE DRESS—REMOVABLE CAPE THAT BUTTONS TO FRONT OF DRESS

By Ellen Worth

Here's a darling little dress—and so unbelievably simple to sew. Well, it could almost be run up before breakfast.

Two ways to make! Smart either way—with or without the removable cape collar.

For playtime you'll probably choose from the very practical cottons as crinny crepe prints, percale prints, broadcloths, gingham, etc., and trim with contrasting bias bands. For daintier wear, it is just as pretty as can be of sheer cottons as dimity, batiste, dotted swiss, organdy, etc.

Style No. 524 is designed for sizes 2, 4 and 6 years. Size 4 requires 2 yards of 39-inch material with 1½ yards of 1-inch ribbon for dress with collar and ½ yards of 35-inch material for dress without collar.

Patterns 13c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McRae Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

The Caragana Hedge

There are several species of the caragana plant in Western Canada, but the one most commonly found and used very widely is the variety introduced from Siberia. The caragana is so hardy and vigorous, and adapts itself to such varied conditions of soil, that it must be considered a most valuable plant for field or garden shelter purposes.

The magnetic poles are the points on the earth's surface where the lines of magnetic force are vertical. They are the ends of the axis of the earth's magnetic polarity.

For Prison Reform

Borstal System Is Recommended For Canada

After studying in detail application and operation of the Borstal system in six English prisons, General D. M. Ormond, superintendent of Canadian penitentiaries, has reported to the Dominion government his opinion that similar training and treatment of youthful offenders can and ought to be put into effect in Canada.

Hon. Hugh Guthrie, minister of justice, tabled General Ormond's report in the House of Commons and declared the system may be made effective in Canada within 60 days. No legislation and no extra money vote would be necessary but there would be some staff additions and extra buildings needed.

The Borstal system, forecast for Canada in the speech from the throne at parliament's opening in January, "is a combination of mental, moral, physical and industrial training of a strenuous kind," for convicts under the age of 21 years.

Selected penitentiary inmates under the age of 21 would be housed separately and made the subject of this training with a view to correcting criminal instincts and preparing the youth for more useful effort on discharge.

New Type Radio Sets

France Is Installing Penny-In-The-Slot Machines

Penny-in-the-slot radio sets for the home have been introduced in France. Instead of buying a set, it is possible to have installed free a high-powered set with a small slot machine attached. On putting a franc into the slot 40 minutes' radio programme is assured. This may be either at a stretch or in several short programmes until the 40 minutes are exhausted. A maximum of ten francs may be put in at a time, thus ensuring nearly seven hours of music.

First Jap Car In Rand

The first Japanese automobile to reach the Rand of South Africa has created much interest. It is a little two-seater, driven by a four-cylinder power unit, and has three forward and a reverse gear. It is claimed to travel 50 miles on a gallon of gasoline, and is equipped with a rubber bulb horn which honks Japanese effectively.

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and vitality. Clear skin attracts. The healthy active girl is both happy and popular.

Perhaps you are not really ill yet when the day's work is done you are too tired to enter into the good times that other women enjoy. For extra energy try Lydia E. Pinkham's Vegetable Compound. It tones up your general health. Gives you more pep—more charm.

Remember that 99 out of 100 women report benefit. Let it help you too.

STOPS ITCHING

In One Minute
D. D. D. Prescription Speed Relief

For quick relief from the itching of pimples, mosquito or other insect bites, eczema, rashes and other skin eruptions apply Dr. Dennis' pure, cooling, liquid, antiseptic D. D. D. to the affected area. Forty years' world-wide success. Penetrates the skin, soothing and healing the inflamed tissue. No fuss—no more scratching. Stains and stains—dries up almost immediately. Try D. D. D. Prescription Speed Relief the most intense itching instantly. A 35c trial bottle, at any drug store. D. D. D. is made by the owners of ITALIAN BALM.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he has, and his family is faced with the necessity of a simpler method of living. At this juncture, with her father's aid, she goes to live with her aunt and uncle, an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions. After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. They are met at the railway station by Columbine Nelson, who in turn introduces Mark and Matthew Adams, two neighbors of Aunt Columbine, and the party set out for Pine Ridge, which village causes dismay to both Nancy and Jack because of its dilapidated appearance and general lack of poverty. Nancy and Jack are shown to the rooms they are to occupy, and both the young people consider the furniture and decorations hateful and, contrasting the present quarters with their luxurious home in Boston, wonder if they can endure the change for any length of time. Aunt Columbine tells why she wrote the letter to them, and relates some of her early experiences at Pine Ridge of hostile Indians and forest fires, of her father's hunt for gold, and of her mother's splendid spirit, but frail body, which could not endure the strain of pioneer life.

No Go On With The Story

CHAPTER VIII.—Continued

There followed a silence until Cousin Columbine exclaimed: "Dear me! Here I am dwelling on the past like an old woman; what I should start out to tell you is why I wrote that idiotic letter. You see, my mother instilled into me the knowledge that we came of gentle people—finer people, perhaps, than some of our good neighbors. She was an orphan, with no near relatives of her own; but she was very proud of the Nelson connection and always kept us up to certain standards. If we lived in a cabin with a dirt floor, at least, there were spotless curtains at the windows, and we ate off a white cloth—a clean one too! I think her dream was to send me East for an education; and long as they lived she corresponded with Father's parents, so that he might have neglected to do himself. Later she wrote down the names of the younger members of his family, among them your Grandfather Nelson's, Father's half-brother, telling me that if I were left alone and needed help, I was to appeal to them."

"Did you ever have to?" queried Nancy.

The old lady shook her head.

"But I kept in touch with them, as Mother would have wished. Many have died, of course; for Father was so much older than his half-brothers that he was almost of another generation."

"It must seem strange never to have seen any of your own people," commented Jack.

"Not only strange," said Cousin Columbine, "but sad, in a way. It was that sadness which caused me to make a resolution to see some one belonging to me—some one of my own blood, before I died."

"But why didn't you go East for a visit?" questioned the boy, forgetting the consternation he had felt at this idea when Jack's father, Aunt Louise had read aloud the letter from their distant relative."

"Because," responded the astute old lady, "I was not sure of a welcome! I realized that I was nothing to my Eastern cousins, but a bit of family history—a queer old woman, perhaps, who was born in a

covered wagon, and whose life had been lived in a little Colorado town. Besides, I dreaded to be away from home, even temporarily. My roots go deep, like the roots of an old tree that has never been transplanted. I admit I toyed with the idea; but I gave it up, and the next thing was to get some of you to come to me."

She paused, and Jack said, smiling:

"But how did you happen to pick out Nancy?"

"I could hardly expect the older members of the family to drop their work and come at the whim of a cousin who they had never seen, could I? Besides, I had a yearning for some one young. But I've read about these modern girls, Nancy, and was just a bit afraid. Suppose, I asked myself, suppose I get her out here and find she is one of those—those flappers?"

Both young people gave way to laughter, the word sounded so strange on the old lady's lips.

"Do you see now," asked Cousin Columbine, "why I wrote that letter?"

"You mean," said Jack with sudden inspiration, "that no flapper would have accepted your invitation?"

"That's it, exactly. No girl whose sole pursuit was pleasure and society, would have been willing to put up with such a situation. But a girl like Nancy, would, I was sure, be glad to help out a poor old lonely cousin. So I made the job as unattractive as I could. It's true that Aurora doesn't do everything my way, and that often I'm desperate for some one to take a stitch for me, since I loathe the very sight of a needle, and always did. Oh, there was enough truth in that letter so it didn't lie very heavily on my conscience! And when I read it over I said to myself: 'Cousin Nelson, no one but a good, sensible, old-fashioned girl would consider this proposition for a minute; and you don't want the other kind.' So I mailed the letter."

The room was silent for a moment. Nancy's cheeks flamed, not solely from her close proximity to an airtight stove. What would Cousin Columbine think if she knew how impossible that proposition seemed to her? That nothing in the world save Dad's financial losses would have made her give it a second thought—that she wouldn't have considered it even if Jack hadn't thought out this scheme and put it through while she fought (or wanted to) to the last ditch? Nancy knew she was selling under false colors, and didn't like it. She even avoided meeting her brother's eyes as she responded: "I'm afraid you'll be awfully disappointed in me just the same."

"No," asserted Mrs. Columbine briskly: "I either like a person at first sight, or I don't like them. Been that way always. I'll admit you look rather uncommittal; but that's nothing against you if there are brains in that pretty head of yours, and I don't doubt that, you being a Nelson. As for your brother, his brains were evident in the letter he sent me. Back in my father's day he would have been a pioneer."

Nancy laughed.

"I can't see Jack driving a covered wagon, Cousin Columbine."

"You don't have to in these days of automobiles. But he's got the spirit, and that's what counts, my dear."

Jack flushed now, not being as sure as Cousin Columbine that he possessed the courage of his forefathers.

"When do I go to work?" he questioned, in an effort to change the conversation.

The old lady hesitated, and then said: "Here's my second confession: When I sent that telegram I had a job for you on the McKenzie ranch over Divide way; but the next day Mrs. McKenzie telephoned that her nephew from Boulder wanted the place after all. Don't look distressed, Jack. You'll have a job before the week is up. I hope the Adams would have something for you to do, but there are so many boys in the family they seldom hire outside help."

Jack was frowning a little. He said: "I must get something as soon as possible, Cousin Columbine. I don't want to sponge on you for board."

"Fiddlesticks!" she retorted. "This is the first time I've had company in fifty years. But I've asked Mark Adams to be on the lookout, and he'll find something if anybody can. He's smart as a whip; and a good boy into the bargain. All the Adams boys are good. I've always said that if Eve Adams isn't much of a cook, she's a grand success as a mother. Four sons, and every one a credit to the name."

"Eve!" laughed Nancy. "How did she ever dare to marry a man named Adam?"

"Because," replied the old lady with a twinkle, "she'd set her heart on doing just that thing—always said that when she found an Adam she was going to rope him. What she wanted was to find one with Adam for his first name; but when John Adams came along she mapped him up—at least, that's the way she puts it. Eve was a Denver girl. Her father made considerable of a fortune in gold in 1878, and lost it as many others did just then. After years of hardships, so much money went to their heads. Eve's father bought stock in fraudulent companies, and when the boom collapsed—well, he collapsed with it, you might say."

"Were they left with nothing at all?"

"Practically, but Eve's uncle in the East had money, and gave the girl an education. She was in Boston for three years; and on her way home she met John Adams on the train. He was going to California for his health; but when he saw Eve he decided that his health wouldn't be much use to him in California, if she was in Colorado. You needn't grin, Jack. It was just like that—love at first sight. And when she found his name was Adam, that settled it."

"Did he get well?" asked Nancy.

"Mercy yes! For the boys—you've seen two of 'em. They don't look like invalids."

"And there are two more?"

Cousin Columbine nodded.

"Luke's eighteen, and John will be—"

"You don't mean," gasped Nancy, "that they're really named like that—Matthew, Mark, Luke and John?"

Jack mirth, and Cousin Columbine's eyes lighted.

"Indeed they are. Folks at Pine Ridge are used to 'em and never think about it; but I dare say it sounds queer to outsiders. That was Eve's doing. She's sort of fantastical and dreamy. But she's a wonderful woman and her husband worships the ground she walks on. I wish I could have got you a job there, Jack. They're fine people—the Adams. Goodness gracious, children! It's almost eleven o'clock! I haven't sat up so late since 1902 when the schoolhouse burned down and Aurora pounded on the door to wake me up on her way to the fire. Breakfast at seven. We'd better be getting settled for the night."

It had, Nancy admitted, as she snuggled down under the heavy patchwork quilt, been an interesting evening. After all, she wouldn't write that letter to her father—not yet, anyway.

CHAPTER IX.

More than two weeks slipped by with no sign of a job for Jack. This time, however, the boy, though Cousin Columbine insisted that he more than earned his board by chopping firewood—new work to Jack, though when his sister consoled with him one afternoon, he declared he enjoyed it.

"But just the same, Nancy," he added, lowering his voice that Aurora Tobols, peeling potatoes at an open window, shouldn't hear. "I'm worried. I've got to earn some money; I've got to earn some money; body round here needs a ranch hand? Mark's been inquiring everywhere and hasn't got so much as a bite. 'Say!' (tearing off his sweater and tossing it upon the ground), 'can you believe it's December first?'"

Nancy countered: "There was a tang to the air, but the day seemed more like late fall than winter; and the sky was as blue as it is possible for a sky to be."

"I think," Nancy confided as she perched precariously on the chopping block, "that this bright sunshine keeps us from being homesick. Since that first afternoon I've had only a few twinges; though I rather dread the time when we're settled down and you away somewhere. Cousin Columbine says we ought to be seeing some of the points of interest around here. I'm going to climb that hill off to the north. Do you want to come?"

Jack glanced at the wood pile.

"Can't just now. You run along alone. Look here!" (as she started off), "haven't you got anything but those silk stockings?"

"That's exactly what I asked her this morning," Aurora's voice came through the open window. "Like as not that handsome pair of hose will be full of runs when you get back, Nancy Nelson! Why not borrow a pair of Miss Columbine's black cottons?"

Jack was obliged to hide a grin at a vision of his fastidious sister in cotton stockings; and Nancy replied, almost impatiently: "Oh, see here, Aurora, didn't Juanita have on silk stockings at the post office this morning?"

"If she did, I'll paddle that girl when I get home," asserted the good woman. "Juanita Tubbs wearin' silk stockin's in the mornin'! What's the world comin' to?"

"Mercy!" gasped Nancy. "Have I got Juanita into trouble? I hope not. Next time we go down to the Springs, Aurora, I'll buy some woolen sport hose. I thought I packed a pair, but can't find them. Now don't worry any more on that subject. How do I reach that hill—the one with the pine trees on it?"

(To Be Continued)

Derelicts Cause Trouble

Wrecked Ships Sometimes Drift For More Than Year

A derelict fleet of wrecks has caused no fewer than sixteen serious collisions, resulting in the loss of 300 lives, in the last five years.

Recently, the United States Hydrographic Bureau black-listed fifty hulks which are wandering aimlessly in the Atlantic, off the American coast. Among them were found a windjammer, whose sails bore the name of an Australian sailmaker, a single-masted ketch from Marseilles, and, most astonishing of all, a fishing smack with a quantity of live fish in her trawls. The authorities are now considering the most effective means of destroying them. The tenacity with which some wrecks cling to the surface; long after being abandoned, is remarkable. A few even defy assaults by bombs and cordite.

Dramatically abandoned in 1923, the Governor Parr, instead of sinking instantly as her crew supposed, proceeded to keep her masts above water for the next two years. She became such a menace to shipping that a boat was sent to bring her home to the scrap yard. But the old wreck was reluctant to leave the ocean. A storm sprang up, the tow rope snapped, and thus she wandered off on her lonesome again. Four months later, after a second excursion, had watched her blazing fiercely, she was sighted three times in one week!

Another hardy wanderer, the Wyer Sargent, whose crew were picked up by a Swedish vessel, off Cape Hatteras, was sighted during the next eighteen months by twenty-seven ships. Once she appeared 600 miles off the Azores, and on the last occasion 900 miles off the Bermudas. It was estimated that this derelict had twice crossed the line, and the Atlantic once—making a voyage of 8,000 miles.

When, a few winters ago, the Dunkirk brig, Nerina, overturned in a squabbling sea, off the Scilly Isles, six men were imprisoned in her cabin. Their first thought was to smash a hole through the floor—in that case the roof—but, fortunately, the skipper's better sense prevailed, for the rush of air thus created would immediately have sent the brig like a stone to the bottom. After a week of hideous imprisonment, the Nerina suddenly split asunder with a terrific crash, and the six startled men found themselves miraculously wrecked on the shore of the Scilly Isles.

To Replace Cotton

Fabric From Wood Pulp Coming On The Market

The London Daily Express quotes Dr. E. F. Armstrong, one of Great Britain's leading industrial chemists, that cotton will be replaced by a fabric made from woodpulp.

"Scientists have now discovered a way whereby staple fibre from wood pulp can be made into a fabric on machinery now in use in the cotton mills," the Express quoted Dr. Armstrong. "New factories to supply this material are already being built in Lancashire."

Saving deposits in Germany are showing a sharp increase.

Memorial To Hall Caine

Beautiful Monument On Isle Of Man Is Completed

The tombstone of Sir Hall Caine and his wife in Mangfold churchyard, Isle of Man, has been completed after three years' preparation. It consists principally of a cross twelve feet high carved after the pattern of the ancient cross erected to the memory of the first Scandinavian bishop of Man, who was buried in Maughob about 1060.

This cross is ornamented by intricate interlacing in the Celtic style designed by Archibald Knox, an eminent Manx artist. He died before he had drawn all his sketches as they were completed by a disciple, Miss Tuckfield, secretary of the Knox Arts and Crafts Guild in London. Another section of the monument contains carved portraits of leading characters in Hall Caine's novels. For the character of John Storm in "The Christian" the portrait is that of Mr. Matheson Lang, who acted the part in the stage version. Pete, the hero of "The Manxman," was taken by a young Douglas fisherman. Around the base of the monument a verse from the hymn, "Abide With Me," and another inscription, "Slumbering in the deep solitude of the hills he loved so well," is a quotation from Hall Caine's article on Wordsworth's tomb.

Little Helps For This Week

"Who is among you that feareth the Lord, that obeyeth the voice of His servant, that walketh in darkness and hath no light, let him trust in the name of the Lord and stay upon his God." Isaiah 50:10.

When we in darkness walk, Nor feel the heavenly flame, Then is the time to trust our God, And rest upon His name.

He has an especial tenderness for those who are in the dark and have no light, and His heart is glad when they say "I will go to my Father." For He sees thee through all the gloom through which thou cannot see Him. Say to Him, "I am Thy child. Forsake me not." Then fold the arms of faith and wait in quietness until the light goes up in the darkness. Think of something you should do and go and do it, if it be but the sweeping of a room, the preparing of a meal, or a visit to a friend, heed not your feelings, but do your work.

Life Of Parliaments

Would Limit Length To Minimum Of Five Years

That five years should be the minimum effective life of parliaments in the empire was one of the suggestions made by Sir Arthur Welgall, chairman of the council, presiding over a luncheon tendered by the Royal Empire society to the delegates from empire parliaments meeting in London.

He also suggested civil servants in Britain and the Dominions should be inter-changeable; and that both in Britain and the Dominions the governments should include a definite number of ministers without portfolio.

With a parliament of less than five years, said Sir Arthur, the ministry was standing in the stirrups and looking for an election rather than settling down in the saddle. (Australian and New Zealand parliaments are limited to three years).

Malins—"I have discovered what it is that destroys a man's memory completely."

Newton—"What is it? Alcohol or tobacco?"

Malins—"Neither; it's doing him a favor."

Traveler—"Can I get anything to eat in this dump?"

Waiter—"Yes, sah, you kin."

Traveler—"Such as what?"

Waiter—"Such as it is, sah."

SASKAL

Main Street

A. E. Peterson took in the Fair a couple of days last week.

Mrs. L. King of Edmonton is a visitor in Irma this week.

Miss Marion Wilson of Vegreville is visiting her sister, Mrs. Kemp.

Mr. and Mrs. G. A. Tripp returned from their holiday trip on Saturday.

The next four weeks is going to be a busy time for the provincial candidates.

Mrs. Frank Peterson left for Heath last Saturday to live with her daughter, Mrs. Harry Bouck.

Mr. and Mrs. Thos. Saunders and family arrived home from their holiday trip on Tuesday, July 23rd.

Mr. Curran, inspector from the Department of Municipal Affairs, visited Irma on Monday last Tuesday.

Mrs. James Pond Jr. left on the flyer last Tuesday morning for Vancouver, B.C., where she will visit relatives and friends.

Mr. H. W. Love was in Irma on business last Tuesday. Mr. Love reports a good year for bees and honey in the Edmonton district.

The minutes of the July meeting of M. D. Buffalo Coulee will appear in our next issue. Owing to the length of the manuscript we are unable to set the type for this week.

Mrs. Olive Sather accompanied by her cousin, Miss A. Lerie, and Miss Phyllis Thurston, left the first of this week on a motor trip to the U.S. to visit Mrs. Sather's parents.

The hot dry spell we have experienced the last two weeks has been havoc with the crops. We have been fortunate however to escape hail so far.

Mr. John Ostad of the Irma garage is still crippled, unable to attend to his work. We hope that this will not be for long.

A general meeting of the Irma Branch No. 112, Canadian Legion, will be held in Hedley's hall on Saturday, August 3rd, at 8 p.m. The Ladies' Auxiliary will also meet at the same time. All members are urgently requested to attend.

Emil Hardy, for more than a score of years a resident of this district, left Irma on Wednesday evening's flyer en route to his former home in Gutenberg, Sweden, where he still has relations. He purposes remaining indefinitely.

Dr. H. L. Courier, C.C.F. candidate nominated by the U.F.A. party of Wainwright constituency, and Mr. Walter Ments, secretary of the C.C.F. for Alberta, held a meeting in Kiefer's hall, Irma, on July 22. There was a fair attendance and quite a number of questions were asked during the question period.

The death of Miss E. Matthews of the Irma district occurred Tuesday evening, July 23, at the Royal Alexandra hospital, Edmonton, after a lingering illness. Miss Matthews has lived with her brother William on his farm north of Irma for a number of years. The body is being buried in the Dayland cemetery on Thursday. A number of relatives of the deceased reside in Dayland.

WEDDING BELLS

HUSE - MURRAY

A very pretty wedding was solemnized at the home of Mr. and Mrs. Frank Murray, Kinsella, when their eldest daughter, Mary Alice, became the bride of Mr. Peter O. Huse, of Alliance. The ceremony was performed by the Rev. R. W. Griffith.

The bride was gracefully gowned in white silk. Her shoes and gloves matched the gown, and she carried a bouquet of American Beauty roses. She was given in marriage by her father. The wedding march was played by Miss Georgina Lees.

Miss Vinny Murray, who was the bridesmaid, wore a becoming dress of shell pink silk crepe with white shoes and hat. She carried a sheaf of mauve and pink sweet peas.

The best man was Mr. A. O. Huse, brother of the groom.

Following the ceremony a sumptuous repast was served to the guests, after which Mr. and Mrs. Huse left by motor for Sylvan lake where they will spend their honeymoon.

Those present at the wedding were Mr. and Mrs. Frank Murray, Mr. and Mrs. O. Huse, Mr. and Mrs. James Murray, Mr. and Mrs. Geo. Lee, Mr. and Mrs. Bruce Davis, Rev. and Mrs. Griffith, Miss Vinny Murray, Miss Georgina Lees, Mr. Oren Huse, Mr. E. Huse, Joan, Cora, and Jessie Murray, and little Shirley and Murray Davis.

Further particulars of the wedding of Mr. and Mrs. Paul Szoke which took place at the home of the bride's grandmother, a brief account of which was given last week: To the strains of the wedding march, played by Mrs. Nelwin Peterson the bride and bridesmaid met the groom and best man under a bower of peony blooms on the front porch, where the impressive ceremony was performed by the Rev. E. P. Kemp. The bride was dressed in pink orquid with picture hat, carrying a large spray of pink and white peonies. The bridesmaid was dressed in yellow orquid with hat to match, carrying a bouquet of mixed flowers. About 50 relatives and friends witnessed the ceremony, among them being Mr. and Mrs. Harry Bouck and family from Heath. After partaking of the bountiful dinner the bride and groom departed for a few days at the Edmonton Exhibition, returning Wednesday. They have taken up residence on the groom's farm south-east of town. Their many friends wish them a long and happy life together.

Mr. Wm. Masson of Irma has been chosen as the Social Credit candidate for the Wainwright constituency.

Some of the Irma folks seen at the Edmonton fair were: Mr. and Mrs. Wise, Mr. and Mrs. Barber, Mr. and Mrs. Rembak and daughter Pearl, Mr. and Mrs. R. Williamson and son Junior, Mr. W. Clark, Mr. A. Turnbull, Mr. Hubman and Miss Hadie Hubman, Mrs. Edith Elliott and two sons, Mr. and Mrs. N. S. Johnson and son Garth, Mr. and Mrs. J. Fenton and Mr. Stuart and Miss Reuce Fenton, Mr. and Mrs. Carl Larson, Clarence, Gunman, and Elsie Larson.

SPORT PEEPS

A 14-year old boy is the champion of "barnyard golf". At the Edmonton Exhibition, Grant Evans of Spruce Grove again took most of the honors in competition with the best in Alberta. In the final game against Ashton he scored 29 ringers in twirling 64 shoes. Such accuracy is quite amazing. Viking followers of this good sport will have to practice a little more to be in a class with this youngster.

The Journal road race over the distance of six miles, again found Tommy Aird in the van of the seven runners. Covering the distance in a little less than 35 minutes, indicates a fast pace for this distance. This is a sport that needs no special equipment, and local boys would do well to give themselves training in such road work. It would be very pleasing to have an entry from Viking in the next Journal race.

There have been plenty of arguments over the respective merits of show dogs and the mongrel type. Many people admire the thoroughbred for beauty, but prefer the mongrel or mixed breed for ability and intelligence. At the exhibition last week Doberman Pinscher from Wisconsin captured the prize for the "best animal in the show." It's nice to have both beauty and brains.

The Duke of Kent lost his shirt playing golf, against his brother the Prince of Wales. No, it was not a bet, the Duke having removed his garment as excess covering. Possibly someone wanted the shirt as a souvenir. With the royal duke as leader in this style, local tennis enthusiasts and golfers will have an excellent precedent for the discarding of the shirt.

Although New York teams are on top of the list in both National and American leagues, your guess for some other team will be just as good possibly for the finish of these races. Just like a horse race, the pace may be so tiring that in the home stretch, the other animal may come in first under the wire.

New Church Hall Opened

The new St. Mary's church hall was opened on Sunday, August 21st. A large congregation being present. St. Thomas Church was represented, as was also St. Margaret's, Battle Heights, together with members of St. George's, Jarrow.

It is only about six weeks ago that the suggestion was made at a W.A. meeting that a building be erected, and though it sounded hopeless at the time, as it has done many times before the suggestion was accepted, the situation carefully gone into, plans prepared, and as a result there it stands, a small church hall on the property of Mr. Yeend.

We are indebted to many who helped us during the course of construction. To Mr. Sanders for acting as foreman on the first day, to the friends from Battle Heights, Mr. Batchelor and Mr. Holt and to the many men of the Irma congregation who turned out during the busy season to help. To the ladies also who provided lunches, and to Arthur who was here, there and everywhere, camp cook and handy man.

Last we very much appreciate Mr. Yeend's offer of the use of that portion of his property until such time as we can see clear to purchase lots of our own.

The church hall is very small, a mere shell in fact, and as yet very incomplete. Gifts are beginning to come in and the venture of faith is amply justified.

The Church on Sunday was beautifully decorated with flowers, the gift of friends across the way.

WEEKLY REVIEW
PROV. MARKETS

Cattle

BEEF—Anything on the grainfed order at Edmonton this week found a ready outlet, particularly steers. Grassers, however, were slow movers. Prices based on grainfed stock, grassers about \$1 lower. Good to choice steers \$5@5.50; medium 4.25@4.75; common to fair \$3@3.50. Good to choice heifers 4.50@5; medium 3.50@4; common to fair 2.50@3.50. Good to choice cows \$3@4; common to medium 1.50@2.50; canners and cutters 75¢@1.25. Bulls 1.50@2. Bulk of calves selling 3.50@4; common to medium \$2@3. FEEDERS-STOCK-ERS—Ready sales at steady prices. Good stockers \$3@3.50; common to medium 1.50@2.50.

Hogs

Edmonton prices steady. Bacon, 7.75; select 8.25 and butchers 7.25, fed and watered weights.

Sheep

Sheep division steady at Edmonton. Lambs \$5@5.50; yearlings 2.50@3.50 and ewes \$1@2.50.

Cream-Butter-Milk

CREAM—Quotations holding steady: Special 16c; first 14c; second 11c. Receipts in south declining; northern production holding up. Provincial supply for June down 15% compared with same period last year. CREAM-BUTTER—No. 1 cartons 22c; No. 2 21¢@21½¢; No. 1 prints 21c; No. 2 19¢@20¢. Sales good. DAIRY BUTTER—Fancy table 15¢@17c; No. 1 12¢; No. 2 7c. MILK—Supply shows surplus over requirements. Prices steady: Edmonton 1.85; Calgary 1.95 per 100 lb. Basis 3.5.

Poultry—Eggs

POULTRY—Receipts light but trade hoping for improvement; even broiler movement very slow this year. Fair trade at Calgary last week during stampede, while Edmonton hotels and restaurants are buying this year. Prices steady: Broilers 10¢@12c; fowl No. 1 over 5 lb 7c; under 5 lb 5c; No. 2 4c; roosters 4c. EGGS—Receipts very light; undertone firm. Nothing going into storage. Prices unchanged: 'A' large 15c; 'B' 12c and 'C' 10c. Specialized producers: 'A' medium, 20¢@22¢; 'A' small, 18¢@19c; 'A' large 20¢@21c; 'A' medium 17¢@18c; 'A' pullets, 15¢@16c.

Hay—Feed Oats

HAY—Nothing doing in carload line, but improvement noted in small lots at Calgary. All offerings baled upland. Cutting becoming general. Fair demand, but prices easing. Timothy \$11@12; alfalfa \$10 at country points; but market may drop when supplies get better. Timothy, baled \$15@16; upland, baled \$11@12; loose, \$10@11 per ton, delivered. FEED OATS—Market very quiet. Offerings only arriving as required. Price steady at 34¢@35¢ per bushel, delivered.

Agricultural Field Day

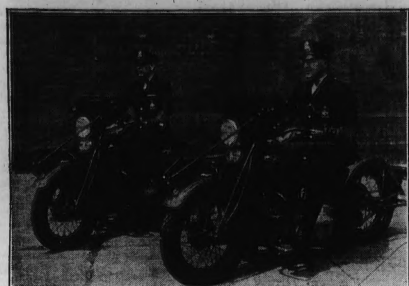

All roads lead to the farm of Mr. Chas. Ball, south of Sedgewick, on Wednesday, July 31st, where the big Agricultural Field Day is being held. The programme for this day is bigger and better than ever, full of valuable information, which farmers wish to know, social numbers that will give you a big laugh.

Word has been received from all those whose names appear on the handbills that they will be present as announced.

The programme will be both educational and pleasing to everyone. We are looking for a big gathering of farmers and their friends.

Do not miss this big field day. Come early and spend the whole day. Bring your lunch basket, other refreshments at the farm. Everybody welcome.

First Radio Motorcycle Cops in Canada

THE first permanently installed radio-equipped motorcycles in Canada are the two shown above with officers Geo. Motyer and P. Gathens of the Verdun Police Motorcycle Squad, photographed as they drove away immediately after their machines were equipped by a Northern Electric radio engineer on June 21st. The radio sets are located on the handle bars. The "V" shaped rods in front serve both as supports and antenna.

JUDICIAL SALE OF FARM PROPERTY

NEAR IRMA, ALBERTA

There will be offered for sale by public auction by Mr. J. W. Stuart, at the Post Office in Irma, Alberta, on Saturday, the 10th day of August A.D. 1935, at 2 o'clock in the afternoon, the following lands, namely: The N. W. ¼ Sec. 36, Twp. 46, Rge. 8, W. 4th Mer., containing 160 acres, more or less, reserving unto His Majesty all mines and minerals.

The Vendor is informed that there are 75 acres of cultivated land of which all was summerfallowed in 1934, 80 acres of arable land, 25 acres of which is brush, and about 5 acres of waste land. The soil is chocolate loam with clay subsoil 12 in. deep. The property is all fenced with 2-strand barbed wire and is watered by a bored well. Buildings consist of a 2-storey Dwelling 18x28 with Leanto Kitchen 14x14; Barn 22x30 with hay loft and Leanto Shed on North side 14x50. The property is situated about 3 miles from Irma; 3 miles from a school and 8 miles from an elevator.

The Sale is subject to an upset price of \$2400.00.

TERMS OF SALE: Ten per cent of the purchase price to be paid at the time of the sale, and the balance into Court within sixty days without interest, or in the alternative a deposit of ten per cent as aforesaid and a mortgage on the land in favor of the Vendor for \$500.00 which shall be a first charge on the property, payable in five equal annual instalments with interest at seven per cent per annum, and the balance of the purchase price to be paid into Court within sixty days without interest.

In all other respects the terms and conditions of sale will be the standing conditions of sale of the Supreme Court as approved by the Judge in Chambers.

For further particulars apply to Griesbach, O'Connor & O'Connor, Barristers, Suite 1, National Trust Building, Edmonton, Alberta.

Dated at Edmonton, Alberta, this 7th day of June, A.D. 1935.

R. P. WALLACE, Clerk of the Supreme Court.

Approved: "W. C. Ives"
